Robert A. Adams — Single Variable Calculus
Terence Tao — Solving Mathematical Problems
Walter Isaacson — Steve Jobs
Mark Manson — The Subtle Art of Not Giving a F*ck
System Design Interview — Alex Xu
Tao Te Ching — Laozi
Heather Morris — The Tattooist of Auschwitz
David Spiegelhalter — The Art of Statistics
Raymond Chandler — The Big Sleep
Don Brown — The Da Vinci Code
The Histories — Herodotus
The Iliad — Homer
The Odyssey — Homer
Will Durant — The Story of Philosophy
Napoleon Hill — Think and Grow Rich
Daniel Kahneman — Thinking Fast & Slow
The Three Theban Plays — Sophocles
Friedrich Nietzsche — Thus Spoke Zarathustra
The Adventures of Tintin — Hergé
Robert Louis Stevenson — Treasure Island
Arthur Cotterell & Rachel Storm — The Ultimate Encyclopedia of Mythology
James Parinella & Eric McCarthy — Ultimate Techniques and Tactics
Stephen Sikkell — Understanding Analysis
Sam Collins — Understanding the Chess Openings
Alan Moore & David Lloyd — V for Vendetta
War and Peace — Leo Tolstoy
Yevgeny Zamyatin — We
Richard Courant & Herbert Robbins — What is Mathematics?
Matthew Walker — Why We Sleep
William Wordsworth — Selected Poems of Wordsworth
Paul Gwynne — World Religions in Practice
Wesley So & Michael Adams & Graham Burgess et al — The Mammoth Book of the World's Greatest Chess Games
Emily Bronte — Wuthering Heights
Robert M. Pirsig — Zen and the Art of Motorcycle Maintenance

Benjamin Graham — The Intelligent Investor
James Hurley — Intermediate Calculus, (Multivariable Functions and Differential Equations with Applications
David S. Moore — Introduction to the Practice of Statistics
Hogg & McKean & Craig — Introduction to Mathematical Statistics
Bert Mendelson — Introduction to Topology
Kolmogorov — Introductory Real Analysis
Oxford Beginner's Japanese Dictionary — Oxford
Harold Ono — Japanese Grammar
Herbert Schildt — Java: The Complete Reference
Haruki Murakami — Kafka on the Shore
Andrew Scott Conning — Kodansha Kanji Learner's Course
Jon Bodner — Learning Go
Letters from a Stoic — Seneca
Howard Anton — Elementary Linear Algebra, with Applications
Robert Hoovers — Linear Algebra for Calculus
Elementary Linear Algebra — David Hill
Edward Landesman — Linear Algebra
Stewart Venit — Elementary Linear Algebra
Robert MacCamy — Linear Analysis and Differential Equations
William Golding — Lord of the Flies
Edward Frenkel — Love and Math
Deisenroth & Faisal & Ong — Mathematics for Machine Learning
McDaniel Brown, Roediger — Make It Stick: The Science of Successful Learning
Stuart Hooper — Makers of Mathematics
John Allen Paulos — The Mathematics Lover's Companion
Joshua Holden — The Mathematics of Secrets
Richard Bellman — Introduction to Matrix Calculus
Marcus Aurelius — Meditations
Immanuel Kant — Fundamental Principles of the Metaphysic of Morals
John R. Searle — Minds, Brains, and Science
Herman Melville — Moby Dick
Andrew S. Tanenbaum — Modern Operating Systems
Nick de Firmian — Modern Chess Openings
Moonwalking with Einstein: The Art and Science of Remembering Everything — Joshua Foer
Stephen Hawking — My Brief History
Yukio Mishima :: The Midnight Eclipse
Mung Chiang — Networked Life
Peter Lynch — One Up On Wall Street
Wilfred Owens — War Poems and Others
Hans F. Weinberger — A First Course in Partial Differential Equations
Plato & Socrates & Euripides et al — Plato's Dialogues
George Angus — Pocket Guide: Human Body
Jane Austen — Pride and Prejudice
Scott Chacon & Ben Straub — Pro Git
Kevin Murphy — Probabilistic Machine Learning
E.T. Jaynes — Probability Theory: The Logic of Science
M.L. Krasnov — A Book of Problems in Ordinary Differential Equations
Roberto Lerusalimschy — Programming in Lua
Andrew Franklin & Keith Doode — Proof in Mathematics: An Introduction
A Course of Pure Mathematics — G.H. Hardy
Qur'an — God
Janet Ashby — Read Real Japanese
Martin Fowler — Refactoring
Robert T. Kiyosaki & Sharon L. Lechter — Rich Dad Poor Dad
Yuval Noah Harari — Sapiens, A brief History of Humankind
Frances Hodgson Burnett — The Secret Garden
Dale Dougherty — Sed & Awk
Seven Brief Lessons on Physics — Carlo Rovelli

Erich Gamma & John Vlissides & Richard Helm et al — Design Patterns: Elements of Reusable Object-Oriented Software
Anonymous — Dhammapada
Frank McMullen — Differential Equations, Essential Skills
Robert Borrelli — Differential Equations: A Modeling Perspective
Henry J. Ricardo — A Modern Introduction to Differential Equations
Erwin Kreyszig — Differential Geometry
Richard Courant — Differential and Integral Calculus
K. Rameswar — Diophantine Equations
Susanna S. Epp — Discrete Mathematics with Applications
Alexander Shvets — Dive into Design Patterns
Dante Alighieri — The Divine Comedy
Norman Wildberger — Divine Proportions
Daniel J. Barrett — Linux Pocket Guide
Austin Dobson — Collected Poems of Dobson
Miguel de Cervantes — Don Quixote
Aldous Huxley — The Doors of Perception
Dominic Milton Trott — The Drug Users Bible: Harm Reduction, Risk Mitigation, Personal Safety
Brett Slatkin — Effective Python
Daniel J. Barrett — Efficient Linux at the Command Line
Trevor Hastie & Robert Tibshirani & Jerome Friedman — The Elements of Statistical Learning
T. S. Eliot — Selected Poems
Jane Austen — Emma
Abelson & Sussman — Elements of Programming (Structure in Lisp)
Pasquale Baccarini — Essential Ultimate
The Usborne Book of Facts and Records — Scott Ross
Fudeko Reekie — A First Course in Japanese Workbook
Fudeko Reekie — A First Course in Japanese
Terence McKenna — Food of the Gods
Mykyta Chernenko — Full-Stack Web Development with TypeScript 5
Edward G. Phillips — Functions of a Complex Variable
Garrett Snider & R. Kent Nagle & Edward B. Saff — Fundamentals of Differential Equations
Genki I Workbook — NHK
Japan Times — Genki I
F. Scott Fitzgerald — The Great Gatsby
Jonathan Swift — Gulliver's Travels
William Shakefpeare — Hamlet
Douglas Adams — The Hitchhiker's Guide to the Galaxy
Holy Bible — God
Aurélien Géron — Hands on Machine Learning
Daniel J. Velleman — How to Prove It
Mortimer J. Adler — How to Read a Book
Sönke Ahrens — How to Take Smart Notes
Dale Carnegie — How to Win Friends and Influence People
The Adventures of Huckleberry Finn — Mark Twain

Jordan B. Peterson — 12 Rules for Life
George Orwell — 1984
Thomas Engqvist — 300 Most Important Chess Exercises
Timothy Ferriss — The 4-Hour Workweek
Robert Greene — 48 Laws of Power
Frank McMullen — 50 Challenging Calculus Problems
Laszlo Polgar — Chess 5334 Problems, Combinations and Games
Stephen Covey — The 7 Habits of Highly Effective People
Robert L. Caplan — Advanced Calculus
Francif Bacon — The Advancement of Learning
Aeneid — Virgil
Andrew Hodges — Alan Turing: The Enigma
Dasgupta & Papadimitriou & Vazirani — Algorithms
Algorithms in C, Part 5: Graph Algorithms — Sedgewick
Algorithms in C, Parts 1-4 — Sedgewick
Lewis Carroll — Alice's Adventures in Wonderland
Larry Wasserman — All of Statistics
Eric Jorgenson — The Almanack of Naval Ravikant
Robert J. Chassell — An Introduction to Programming in Emacs Lisp
George Orwell — Animal Farm
Lucy Maud Montgomery — Anne of Green Gables
Nicholas Nassim Taleb — Antifragile
Ariel — Sylvia Plath
Mortimer J. Adler — Aristotle for Everybody
Arnold Schwarzenegger & Douglas Kent Hall — Arnold: The Education of a Bodybuilder
Art of War — Sun Tzu
Sheldon Axler — Measure, Integration & Real Analysis
The Barefoot Investor — Scott Pape
Seiichi Makino & Michio Tsutsui — A Dictionary of Basic Japanese Grammar
Jean Paul Sartre — Being and Nothingness
Bhagvad Gita — Vyasa
E. H. Lockwood — A Book of Curves
Markus Zusak — The Book Thief
Ray Bradbury — Bradbury Stories
Stephen Hawking — A Brief History of Time
Brian W. Kernighan & Dennis M. Ritchie — The C Programming Language
Frank McMullen — Calculus with Multiple Variables
Robert A. Adams — Calculus of Several Variables
Steven Sallas — Calculus 1 and Several Variables
Geoffrey Chaucer — The Canterbury Tales
Carl Friedrich Gauss — Carl Friedrich Gauss
J. D. Salinger — The Catcher in the Rye
Jeremy Silman — The Complete Book of Chess Strategy
Selected Works — Cicero
Thomas H. Cormen & Charles E. Leiserson & Ronald L. Rivest et al — Introduction to Algorithms
Kai Hwang & Jack Dongarra — The Computer Manifesto
William Shakespeare — The Complete Works of Shakespeare
Complex Variablef with an Introduction to Conformal Mapping and Itf Applicationf — Saburou
James W. Brown & Ruel V. Churchill — Complex Variables and Applications
James F. Kurose & Keith W. Ross — Computer Networking: A Top-Down Approach
Ronald L. Graham & Donald E. Knuth & Oren Patashnik — Concrete Mathematics
Leo Tolstoy — The Cossacks
Alexandre Dumas — The Count of Monte Cristo
Fyodor Dostoevsky — Crime and Punishment
Robert Lafore — Data Structures and Algorithms in Java
Abraham Silberschatz & Henry F. Korth & S. Sudarshan — Database System Concepts
Martin Kleppmann — Designing Data-Intensive Applications
Ian Goodfellow — Deep Learning
Cal Newport — Deep Work
