Tao Te Ching — Laozi
Herman Melville — The Confidence-Man
David Spiegelhalter — The Art of Statistics
Raymond Chandler — The Big Sleep
Dan Brown — The Da Vinci Code
The Histories — Herodotus
The Iliad — Homer
The Odyssey — Homer
The Story of Philosophy — Will Durant
Leonard Mlodinow — The Drunkard's Walk
Napoleon Hill — Think and Grow Rich
Daniel Kahneman — Thinking Fast & Slow
The Three Theban Plays — Sophocles
Friedrich Nietzsche — Thus Spoke Zarathustra
The Adventures of Tintin — Hergé
Robert Louis Stevenson — Treasure Island
Arthur Cotterell & Rachel Storm — The Ultimate Encyclopedia of Mythology
James Parinello & Eric McCarthy — Ultimate Techniques and Tactics
Stephen Abbott — Understanding Analysis
Understanding the Chess Openings — Sam Collins
Alan Moore & David Lloyd — V for Vendetta
Leo Tolstoy — War and Peace
Yevgeny Zamyatin — We
Richard Courant & Herbert Robbins — What is Mathematics?
Matthew Walker — Why We Sleep
William Wordsworth — Selected Poems of Wordsworth
Paul Gwynne — World Religions in Practice
Wesley So & Michael Adams & Graham Burgess et al — The Mammoth Book of the World's Greatest Chess Games
Emily Bronte — Wuthering Heights
Robert M. Pirsig — Zen and the Art of Motorcycle Maintenance

Haruki Murakami — Kafka on the Shore
Andrew Scott Conning — Kodansha Kanji Learner's Course
Jon Bodner — Learning Go
Letters from a Stoic — Seneca
Howard Anton — Elementary Linear Algebra, with Applications
Robert Hoovers — Linear Algebra for Calculus
Elementary Linear Algebra — David Hill
Edward Landesman — Linear Algebra
Stewart Venit — Elementary Linear Algebra
Robert MacCamy — Linear Analysis and Differential Equations
William Golding — Lord of the Flies
Edward Frenkel — Love and Math
Deisenroth & Faisal & Ong — Mathematics for Machine Learning
McDaniel Brown, Roediger — Make It Stick: The Science of Successful Learning
Stuart Hooper — Makers of Mathematics
John Allen Paulos — The Mathematics Lover's Companion
Joshua Holden — The Mathematics of Secrets
Richard Bellman — Introduction to Matrix Calculus
Marcus Aurelius — Meditations
Immanuel Kant — Fundamental Principles of the Metaphysic of Morals
John R. Searle — Minds, Brains, and Science
Herman Melville — Moby Dick
Andrew S. Tanenbaum — Modern Operating Systems
Nick de Firmian — Modern Chess Openings
Moonwalking with Einstein: The Art and Science of Remembering Everything — Joshua Foer
Stephen Hawking — My Brief History
James Shreeve — The Neandertal Enigma
Mung Chiang — Networked Life
One Up On Wall Street — Peter Lynch
Wilfred Owens — War Poems and Others
Hans F. Weinberger — A First Course in Partial Differential Equations
Plato & Socrates & Euripides et al — Plato's Dialogues
George Angus — Pocket Guide: Human Body
Pride and Prejudice — Jane Austen
Scott Chacon & Ben Straub — Pro Git
Kevin Murphy — Probabilistic Machine Learning
E.T. Jaynes — Probability Theory: The Logic of Science
M.L. Krasnov — A Book of Problems in Ordinary Differential Equations
Roberto Ierusalimschy — Programming in Lua
Andrew Franklin & Keith Doode — Proof in Mathematics: An Introduction
G. H. Hardy — A Course of Pure Mathematics
Qur'an — God
Janet Ashby — Read Real Japanese
Martin Fowler — Refactoring
Robert T. Kiyosaki & Sharon L. Lechter — Rich Dad Poor Dad
Yuval Noah Harari — Sapiens. A brief History of Humankind
Frances Hodgson Burnett — The Secret Garden
Dale Dougherty — Sed & Awk
Carlo Rovelli — Seven Brief Lessons on Physics
Robert A. Adams — Single Variable Calculus
Terence Tao — Solving Mathematical Problems
Walter Isaacson — Steve Jobs
Mark Manson — The Subtle Art of Not Giving a F*ck
System Design Interview — Alex Xu

Martin Kleppmann — Designing Data-Intensive Applications
Ian Goodfellow — Deep Learning
Cal Newport — Deep Work
Erich Gamma & John Vlissides & Richard Helm et al — Design Patterns: Elements of Reusable Object-Oriented Software
Anonymous — Dhammapada
Frank McMullen — Differential Equations, Essential Skills
Robert Borrelli — Differential Equations: A Modeling Perspective
Henry J. Ricardo — A Modern Introduction to Differential Equations
Erwin Kreyszig — Differential Geometry
Thomas Cormen — Introduction to Algorithms
K. Rameswar — Diophantine Equations
Susanna S. Epp — Discrete Mathematics with Applications
Alexander Shvets — Dive into Design Patterns
Dante Alighieri — The Divine Comedy
Norman Wildberger — Divine Proportions
Daniel J. Barnett — Linux Pocket Guide
Austin Dobson — Collected Poems of Dobson
Miguel de Cervantes — Don Quixote
Aldous Huxley — The Doors of Perception
Dominic Milton Trott — The Drug Users Bible: Harm Reduction, Risk Mitigation, Personal Safety
Brett Slatkin — Effective Python
Daniel J. Barrett — Efficient Linux at the Command Line
Trevor Hastie & Robert Tibshirani & Jerome Friedman — The Elements of Statistical Learning
Selected Poems — T. S. Eliot
Emma — Jane Austen
Aziz & Lee & Prakash — Elements of Programming Interviews (in Java)
Pasquale Baccarini — Essential Ultimate
The Usborne Book of Facts and Records — Sarah Khan
Fudeko Reekie — A First Course in Japanese Workbook
Fudeko Reekie — A First Course in Japanese
Terence McKenna — Food of the Gods
Mykyta Chernenko — Full-Stack Web Development with TypeScript 5
Edward G. Phillips — Functions of a Complex Variable
Garrett Seider & R. Kent Nagle & Edward B. Saff — Fundamentals of Differential Equations
Genki I Workbook — Genki
Japan Times — Genki I
F. Scott Fitzgerald — The Great Gatsby
Jonathan Swift — Gulliver's Travels
William Shakespeare — Hamlet
James Heisig — Remembering the Kanji (RTK)
Douglas Adams — The Hitchhiker's Guide to the Galaxy
Holy Bible — God
Aurélien Géron — Hands on Machine Learning
Daniel J. Velleman — How to Prove It
Mortimer J. Adler — How to Read a Book
Stephen Wilbers — How to Think Smart Stories
Dale Carnegie — How to Win Friends and Influence People
The Adventures of Huckleberry Finn — Mark Twain
Garcia Miralles — Ikigai / 生き甲斐
Benjamin Graham — The Intelligent Investor
James Hurley — Intermediate Calculus, Multivariable Functions and Differential Equations with Applications
David S. Moore — Introduction to the Practice of Statistics
Hogg & McKean & Craig — Introduction to Mathematical Statistics
Bert Mendelson — Introduction to Topology
Introductory Real Analysis — Kolmogorov
Oxford Beginner's Japanese Dictionary — Oxford
Japanese Grammar — Natsuko Duke
Herbert Schildt — Java: The Complete Reference

Jordan B. Peterson — 12 Rules for Life
Ренгле Кнуллл — 1984
Thomas Engqvist — 300 Most Important Chess Exercises
Timothy Ferriss — The 4-Hour Workweek
Robert Greene — 48 Laws of Power
Frank McMullen — 50 Challenging Calculus Problems
Chess: 5334 Problems, Combinations and Games — Laszlo Polgar
Stephen Covey — The 7 Habits of Highly Effective People
Jeffrey S. Rosenthal — A First Look at Rigorous Probability Theory
Robert L. Caplan — Advanced Calculus
Stanislas Dehaene — The Neuronal Recycling of Learning
Aeneid — Virgil
Andrew Hodges — Alan Turing: The Enigma
Dasgupta & Papadimitriou & Vazirani — Algorithms
Sedgewick — Algorithms in C. Part 5: Graph Algorithms
Sedgewick — Algorithms in C. Parts 1–4
Lewis Carroll — Alice's Adventures in Wonderland
Larry Wasserman — All of Statistics
Eric Jorgenson — The Almanack of Naval Ravikant
Robert J. Chassell — An Introduction to Programming in Emacs Lisp
George Orwell — Animal Farm
Lucy Maud Montgomery — Anne of Green Gables
Nicholas Nassim Taleb — Antifragile
Sylvia Plath — Ariel
Mortimer J. Adler — Aristotle for Everybody
Arnold Schwarzenegger & Douglas Kent Hall — Arnold: The Education of a Bodybuilder
Art of War — Sun Tzu
Measure, Integration & Real Analysis — Sheldon Axler
The Barefoot Investor — Scott Pape
Seiichi Makino & Michio Tsutsui — A Dictionary of Basic Japanese Grammar
Jean Paul Sartre — Being and Nothingness
Bhagvad Gita — yogi
E. H. Lockwood — A Book of Curves
Markus Zusak — The Book Thief
Ray Bradbury — Bradbury Stories
Stephen Hawking — A Brief History of Time
Brian W. Kernighan & Dennis M. Ritchie — The C Programming Language
Frank McMullen — Calculus with Multiple Variables
Robert A. Adams — Calculus of Several Variables
Steven Sallas — Calculus 1 and Several Variables
Geoffrey Chaucer — The Canterbury Tales
Carl Friedrich Gauss — Karin Reich
J. D. Salinger — The Catcher in the Rye
Jeremy Silman — The Complete Book of Chess Strategy
Selected Works — Cicero
Thomas H. Cormen & Charles E. Leiserson & Ronald L. Rivest et al — Introduction to Algorithms
Karl Marx & Friedrich Engels — The Communist Manifesto
William Shakespeare — The Complete Works of Shakespeare
Complex Variables: with an Introduction to Conformal Mapping and Its Applications — Schaum
James W. Brown & Ruel V. Churchill — Complex Variables and Applications
James F. Kurose & Keith W. Ross — Computer Networking: A Top-Down Approach
Ronald L. Graham & Donald E. Knuth & Oren Patashnik — Concrete Mathematics
The Cossacks — Leo Tolstoy
Alexandre Dumas — The Count of Monte Cristo
Fyodor Dostoevsky — Crime and Punishment
Robert Lafore — Data Structures and Algorithms in Java
Abraham Silberschatz & Henry F. Korth & S. Sudarshan — Database System Concepts
